### An Economic Theory of Self-Control

Richard H. Thaler

*Cornell University*

H. M. Shefrin

*University of Santa Clara*

The concept of self-control is incorporated in a theory of individual intertemporal choice by modeling the individual as an organization. The individual at a point in time is assumed to be both a farsighted *planner* and a myopic *doer*. The resulting conflict is seen to be fundamentally similar to the agency conflict between the owners and managers of a firm. Both individuals and firms use the same techniques to mitigate the problems which the conflicts create. This paper stresses the implications of this agency model and discusses as applications the effect of pensions on saving, saving and the timing of income flows, and individual discount rates.

For many years Christmas clubs paid no interest. Members deposited money each week but could only withdraw the money on December 1. The clubs were very popular, although they seemed to be dominated by simply depositing money in an interest-bearing savings account.

Passbook loans do still exist. These loans allow an individual with \$5,000 in a savings account earning 5 percent interest to borrow at 9 percent using the balance as collateral, instead of at 10 percent with

The authorship of this paper was fully collaborative. The order of the names on this paper and its companion (Shefrin and Thaler 1980) corresponds to our division of labor. This paper was written while Thaler was a visiting scholar at the National Bureau of Economic Research at Stanford, California. While there he received financial support from the Kaiser Family Foundation and the Robert Wood Johnson Foundation. Helpful comments on earlier drafts were provided by George Ainslee, James Buchanan, Tom Russell, and numerous other friends and colleagues. We thank them all.

## Weitere Hinweise

- Literaturverwaltungsprogramme
  - helfen Literatur zu organisieren
  - werden in entsprechende Textverarbeitungssoftware integriert
  - generieren automatisch eine Referenzliste
  - z.B.: Citavi (Uni-Lizenz!), EndNote für MS-Word, JabRef (für TeX)
- <http://scholar.google.de> (hilfreich, aber teils fehlende Angaben)

The screenshot shows a Google Scholar search for 'cahuc labor economics'. The search results are displayed in German. A popup window titled 'Zitieren' (Cite) is open, showing citation information for the selected article. The popup lists the citation in MLA, APA, and ISO 690 formats. The APA citation is highlighted with a red box: 'Cahuc, P., & Zylberberg, A. (2004). Labor economics. MIT press.' Below the citation formats, there are links for 'BibTeX', 'EndNote', 'RefMan', and 'RefWorks'.
