

# Tone in Wam (Kugama), an Adamawa language of Nigeria

Lora LITVINOVA  
loravlitvinova@gmail.com  
Adamawa Conference 2019, Mainz

## General information on Wam

– *ná: wàm* ‘the Wam language’  
(KUGAMA)

- Yendang group of the Adamawa language family
- Spoken in a number of villages in Mayo-Belwa LGA and Fufore LGA of Adamawa State
- 5000 speakers (Ethnologue)

## Previous research on Wam

- First field trip conducted in Yola, the capital of Adamawa State, in **January 2014** as part of research for my BA and later for my MA theses at St. Petersburg State University, Russia;
- Three field trips to Wam communities (Mayo-Belwa, Adamawa State, Nigeria) as part of my PhD project from Labex EFL (project LC2 “Areal phenomena in northern sub-Saharan Africa”) in **March –June 2017, April – May 2018, and November 2018.**

# Overview

- TBU and tone inventory
- Surface tone patterns of nouns
- Inalienable Possessive constructions as the tonal frame of nouns
- Downstep
- Phonetic tonal processes

## TBU and tone inventory

- TBU in Wam is a **mora**
- Wam has three surface tone levels: **H(igh)**, **M(id)** and **L(ow)**
- Monosyllabic functional morphemes, pronominals commonly carry one level tone, for example:
  - (1) a. *nó* (2PL.PFV)
  - b. *tì* (PROG)
  - c. *ɲā* (NEG)
- But monosyllabic nouns commonly have a complex tone (with very few exceptions)

## Surface tone patterns of nouns

Monosyllabic and disyllabic noun stems such as CV(V), CVC, CV(V).CV have the following tone patterns:

	CV(V)	CVC	CV(V).CV
HM	<i>vāā</i> ‘child’	<i>hōy</i> ‘calabash’, <i>sūm</i> ‘hair (of head)’	<i>bīnā</i> ‘granary’, <i>nāákī</i> ‘cow’
MM	<i>kāā</i> ‘machete’	<i>pūy</i> ‘hole’, <i>zōm</i> ‘poison’	<i>tūkī</i> ‘spitting cobra’
LM	<i>bāā</i> ‘herd’ <i>tēē</i> ‘chicken’	<i>pōy</i> ‘face’, <i>sām</i> ‘slave’	<i>gbènē</i> ‘horse’
MH	<i>dāá</i> ‘sheep’	<i>dūm</i> ‘hyena’	<i>gbīré</i> ‘dwarf’
L	<i>sì</i> ‘thing’	<i>kòy</i> ‘date palm’	
HH			<i>dýéké</i> ‘house’

HM: *h̄y* ‘calabash’

KUG\_20170424\_AC\_037

MM: *h̄ōō* ‘food’

KUG\_20170422\_AC\_035

LM: *b̄m* ‘roundhut, room’

KUG\_20170424\_AC\_037

# Inalienable Possessive constructions as the tonal frame of nouns

1. Inalienable Possessive construction with **Common nouns**  
(+ nominal compounds)

[Possessee + floating L tone + Possessor]

the floating L docks to the left

2. Inalienable Possessive construction with **Proper nouns**

[Possessee + Possessor]

## Inalienable Possessive constructions as the tonal frame of nouns

- In both constructions the Possessee takes the Construct form
- The Construct form differs from the free (citation) form

## The free (citation) form

- The free form of a noun includes an element, which can be deleted with the presence of a modifier. I call this element **extension**. Since it is not a morpheme I use the symbol  $< + >$  to mark it.

(2)	a.	CVV + <sup>M</sup>	<i>yíĩ</i> ‘goat’
	b.	CVN + <sup>M</sup>	<i>tōŋ</i> ‘father’
	c.	CV + <sup>M</sup> + y	<i>bēy</i> ‘stomach’
	d.	CVCV + <sup>M</sup>	<i>gérē</i> ‘pig’
	e.	CCV/CVV + <sup>M</sup> + kV	<i>dyé.ké</i> ‘house’

## The free form and the construct form

- Inalienable Possessive construction with **Common nouns**: **segmental** and **tonal** extensions are deleted
- Inalienable Possessive construction with **Proper names**: **segmental** extensions are deleted

(2)	a.	CVV + <sup>M</sup>	<i>yíĩ</i> ‘goat’
	b.	CVN + <sup>M</sup>	<i>tōŋ</i> ‘father’
	c.	CV + <sup>M</sup> + y	<i>bēy</i> ‘stomach’
	d.	CVCV + <sup>M</sup>	<i>gérē</i> ‘pig’
	e.	CCV/CVV + <sup>M</sup> + kV	<i>dýé.ké</i> ‘house’

## The free form and the construct form

		CV + <sup>M</sup> + y 'stomach'	CCV + <sup>M</sup> + kV 'house'	CVN + <sup>M</sup> 'father'
Allomorph 1	Free form	ḅēy	ḏyéké	tōḥ
Allomorph 2	Construct form 1	ḅáá	ḏyé	tōḥ
Allomorph 3	Construct form 2	ḅáā	ḏyē	

- (3) a. *ḅēy* 'stomach', *náákī* 'cow' → *ḅáá* ḏ*náákī*  
'stomach of the cow'
- b. *ḅēy* 'stomach', *Àlī* (male name) → *ḅáā* *Àlī*  
'stomach of Ali'

(4) a. *dyéké* ‘house’, *wēm* ‘person’

→ *dyé* † *wēm*

‘house of the person’

*dyéké* ‘house’, *Àlì* (male name)

→ *dyē* *Àlì*

‘house of Ali’

## The free form and the construct form 1

Free form		Construct form 1		
H + <sup>M</sup>	<i>bēy</i> ‘stomach’ <i>gērē</i> ‘pig’	H	<i>báá</i> ‘náákī <i>géré</i> ‘dyéké	‘stomach of the cow’ ‘domestic pig’
L + <sup>M</sup>	<i>lēy</i> ‘cheek’ <i>dòòrī</i> ‘star’	L	<i>làà dīī</i> <i>dòòrì gāátē</i>	‘gill’ ‘Orion’
M + <sup>M</sup>	<i>hōō</i> ‘food’		<i>hòò sōm</i>	‘dish made of guinea corn’
HM	<i>dóō</i> ‘rope’	HL	<i>dóò bēkī</i>	‘hunting net’
LM	<i>tēē</i> ‘chicken’ <i>gbènē</i> ‘horse’	MH	<i>tēē</i> ‘bàā <i>gbēné</i> ‘bàā	‘chicken of the flock’ ‘horse of the herd’
MH	<i>dāá</i> ‘sheep’		<i>dāá</i> ‘bàā	‘sheep of the herd’

■ Variations between speakers:

- (5) a. *váá* <sup>ʼ</sup>*bá* <sup>ʼ</sup>*yēy* ~ *váà* *bá* <sup>ʼ</sup>*yēy* ‘bastard’  
(child - stomach/inside - wind)
- b. *tóŋ* <sup>ʼ</sup>*wēm* ~ *tôŋ* *wēm* ‘father of the person’
- c. *dūmlè* *táirī* ~ *dūmlé* <sup>ʼ</sup>*táirī* ‘son-in-law’  
(son/child - father-in-law?)

# Downstep

- The floating L tone causes downstep between the Possessee and the Possessor

KUG\_20181130\_BB\_066

## Downstep (continued)

- The floating L tone causes downstep between the Possessee and the Possessor

KUG\_20181130\_BB\_066

## H-raising/upstep

- H-raising regularly occurs as a phonetic realization of phonological downstep by anticipatory dissimilation of the H to the left of the floating L
- H-raising takes place when
  - H precedes the floating L of the possessive linker
  - HL on one syllable

- (6) a. *ḃáá 'náákī* 'stomach of the cow'  
b. *fáà yéní 'náákī* 'steer'  
c. *yîkī* 'kill' (c.f. *yíkī* 'beat')

## H-raising/upstep (continued)

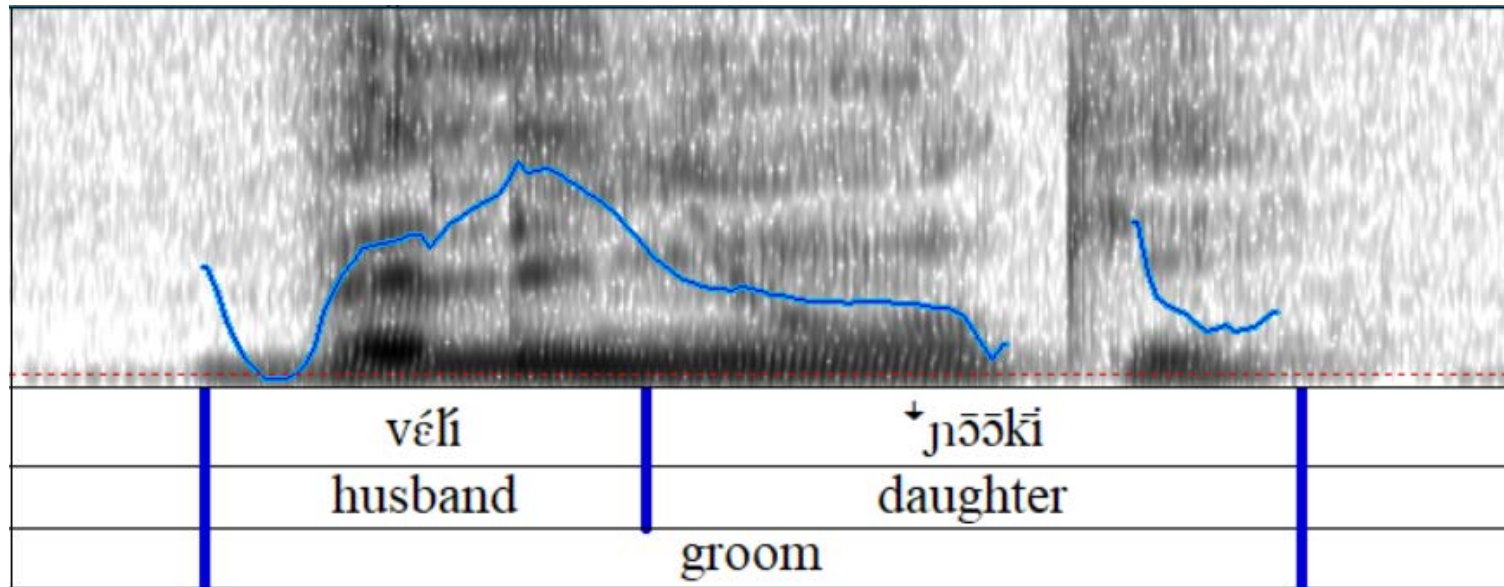

KUG\_20180417\_AC\_001

## H-raising/upstep (continued)

- When there is a succession of syllables with H, the H pitch is raising towards the right edge of the domain

KUG\_20170501\_AC\_049

## The case of anticipatory assimilation

- L is raised when it is followed by extra-H

- (7) a. *gbēné* 'bàā 'horse of the herd'      *gbènē* 'horse', *bàā* 'herd'
- b. *gāā sí<sup>4</sup>tààpō* 'pipe stick'      *gààsì* 'stick', *sí<sup>4</sup>tààpō* 'pipe'
