

SAFETY @ WORK

Declaration

By my signature I herewith certify that I have **attentively read and completely understood** [the general information on safety at work](#) .

I have also **passed** the related **test on my own** (not more than two mistakes). The fully completed and signed **questionnaire is attached**.

In addition, I'm aware of an **obligatory briefing on special security issues** by a responsible person **BEFORE entering any laboratory for the first time**.

Furthermore, I appreciate that

- BEFORE working with **radioactive material** or **ionizing radiation** I need a **radiation protection briefing** by one of the **radiation safety officers**.
- BEFORE working with **lasers** I need a **laser safety briefing** by one of the **laser safety officers**.
- BEFORE working with **chemicals** I need a **chemical safety briefing** by the person in charge (**Mr. Strübig**).

I know, that the **general safety instructions** need to be **refreshed annually**. The same **applies to all other mentioned briefings**, if applicable. **My scientific working group is obliged to keep records of these repetitions** with the help of the fully completed and signed questionnaires.
