

# Springer Nature Protocols and Methods Platform

Life and  
biomedical  
sciences

Stop wasting time searching multiple sources and discover one entry point for over 54,000 Springer Nature Protocols and Methods. The only suite of products to guide the lab scientist from early stages of research to the actual implementation of experiments.

## Our combined Protocols and Methods suite covers:

- Classic protocols to original, innovative research methods
- Simple techniques to complex procedures
- Common research topics to niche and emerging areas of research
- Detailed methodological reviews to short news and research highlights

An innovative search tool is being developed that offers fast answers of exceptional relevance from a uniquely comprehensive, trusted and cost-effective resource that is bringing together all four Protocols and Methods solutions.

## Benefits:

- Optimized Search for scientific protocols and methods
- Improved filtering options with normalized techniques
- Quick at-a-glance evaluation of article relevance
- Comprehensive: aggregated content from Springer and Nature

Bringing together all four Protocols and Methods solutions:
